REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not suggest the combinations of features, as defined in instant independent claims 12, 16 and 30; where in the combinations of features, the cargo anchors/load restrains are provided on the sidewalls and only at locations on the floors proximate the respective openings in the sidewalls. The examiner has reconsidered the ground of rejection of independent claim 30, and determined that it may not be so clearly obvious to combine the prior art of record to arrive to the specific structure defined in claim 30 without hints from the instant disclosure. The specific arrangements of the cargo anchors/load restrains, as defined in independent claims 12, 16 and 30, are particularly significant to avoid drawbacks and to achieve advantages as described on pages 6 and 7 of the instant specification. It is noted that such a limitation "no cargo anchors disposed within other portions of the floor assembly", as recited in claim 30, generally could easily be met by applying a common knowledge of removing components (cargo anchors) from a prior art structure along with the functions thereof. However, such limitation when is considered in combination with other features of the instant claimed invention would bring about significant advantages beyond the teaching of the prior art of record; therefore, such common knowledge is not deemed to be applicable in a ground of rejection. Regarding independent claim 20, the claimed arrangement of the thermal insulators, considered in combination with other features recited in the claim, is defined over prior art of record. Regarding instant claim 31, the claimed drain system, considered in combination with other features recited in the claim,

is defined over the prior art of record. The remaining pending dependent claims are considered to be defined over the prior art of record for at least the same reasons that are noted for their respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
